

Dear 2012 Aquatic Doctors Lake Management, Inc. client,

We look forward to working with you and your neighbors in the care of you lake or pond. We tentatively plan to treat your waters on the following dates. Please keep in mind *theses dates may change slightly*, certain weather conditions can prevent us from proficiently applying the necessary chemicals.

Mon May 14	
Mon June 11	
Mon July 23	

It is very important to remember these dates are determined early in the spring. To try and predict exactly what dates your body of water will need to be managed, is like trying to predict the weather, not that easy. We do make accurate predictions based on past experience, and traditional summer patterns. Please feel free to call and make changes through out the summer. We are prepared to make adjustments to the schedule. Please call 616.365.1698 if you feel treatment dates need to be postponed or moved up to keep the property looking great.

*****Enclosed is a notice that each property owner within 100' of the treatment area must receive. You can complete this notification procedure by soliciting funds, handout flyers or through your local newspaper or newsletter. This notice must be circulated at least seven days in advance of the treatment.*****

If you have any questions or problems with the proposed treatment dates, please contact us as soon as possible to avoid any delays. Thank you

*** Dates may also be affected by permits, and the timely manner the DEQ issues them....**

Sincerely,

M.T. Ryan Schauland
President

NOTICE NOTICE NOTICE NOTICE NOTICE NOTICE

PLEASE TAKE THE TIME TO READ THIS: IT IS FOR YOUR INFORMATION!!!

The property owners in this area are planning to have the waters in this area chemically treated for control of lake weeds and/or algae. This notice is being circulated at least 7 days in advance of the treatment in accordance with Department of Natural Resources procedures. A permit for the treatment has either been secured or will be secured from the DNR before the work is begun.

We treat each lake according to a schedule or season plan worked out with either your lake association, lake board or residents on the lakes and prior reviews. Due to the uncertainty of weather please watch your shoreline for the posting of the 14X11 inch yellow signs, particularly in May and early June. The signs will indicate the date of the treatment, the chemicals used, and the restrictions as to the use of the water for swimming, watering lawns, and the consumption of fish taken from these waters.

In the event that you see us spraying and signs are not posted you will know we have used only copper sulfate or other copper related products which do not limit the use of the water in any way and therefore does not require the posting of any signs.

We anticipate using one or more of the chemicals listed below. Please read the restrictions. Again, these restrictions with their respective chemicals will be found on the restriction signs on day of treatment.

<u>Chemical</u>	<u>Restrictions</u>
Diquat	Swimming or bathing: 1 day Household uses, non-crop irrigation, livestock watering: 5 days Fish consumption: 0 days
2,4-D	Swimming or bathing: 1 day Household uses, non-crop irrigation, livestock watering: 3 weeks (Post "indefinite" per DNR ruling) Fish consumption: 0 days
Triclopyr "Renovate 3"	Swimming or bathing: 0 day Household uses, non-crop irrigation, livestock watering: 0 days Fish consumption: 0 day
Aquathol K Hydrothol 191	Swimming or bathing: 1 day Household uses, non-crop irrigation, livestock watering: 2 weeks Fish consumption: 0 days
Copper Sulfate Chelated Copper	No restrictions

When more than one chemical is used the strictest, longest limits will be posted. These restrictions are designed to allow the safe use of these chemicals. Please do not encourage anyone to use the waters while these restrictions apply.

If you have any questions please contact, Aquatic Doctors Lake Management, Inc. at 616-365-1698
