

Got Muck???

Mukk Busster is designed to decrease levels of organic sediment in lakes and ponds while reducing odors and improving water clarity. The pellets sink quickly, targeting 'muck' on the bottom. Mukk Busster does not contain pathogenic bacteria and it is fish and wildlife friendly. Contains 3 billion CFU/gram (Colony-forming units).

- Pellets sink quickly, targeting the “muck” on the bottom
 - Biodegradable pellet
 - Contains sludge-digesting bacteria and enzymes
- Reduces organic sediment without the use of heavy equipment
- Enzymes Produced- Lipase, Protease, Amylase and Cellulase
 - Does NOT contain pathogenic bacteria
 - Fish & Wildlife friendly
- Naturally eliminates odors caused by muck near beaches and docks

Mukk Busster has a start-up application rate of 20lbs/surface acre and a maintenance application rate of 10lbs/surface acre. Maintenance applications should take place every 2-3 weeks for best results. Mukk Busster is available in 10lbs containers.
